

Lead Management Automation

n8n + Telegram + Google Sheets + Webhooks

Portfolio Case Study

An end-to-end lead processing workflow for a renovation company. The system receives customer requests, validates and classifies them, stores leads in Google Sheets, notifies a manager in Telegram, and records manager actions automatically.

Architecture

Customer / Website	Webhook	n8n Validation	Google Sheets
		HOT / NEW / INVALID	Telegram
		TAKE / REJECT	Status Update

Business problem

Manual lead handling requires employees to copy customer information, determine priority, notify managers, and update statuses. This creates repetitive work and increases the risk of delayed or duplicate processing.

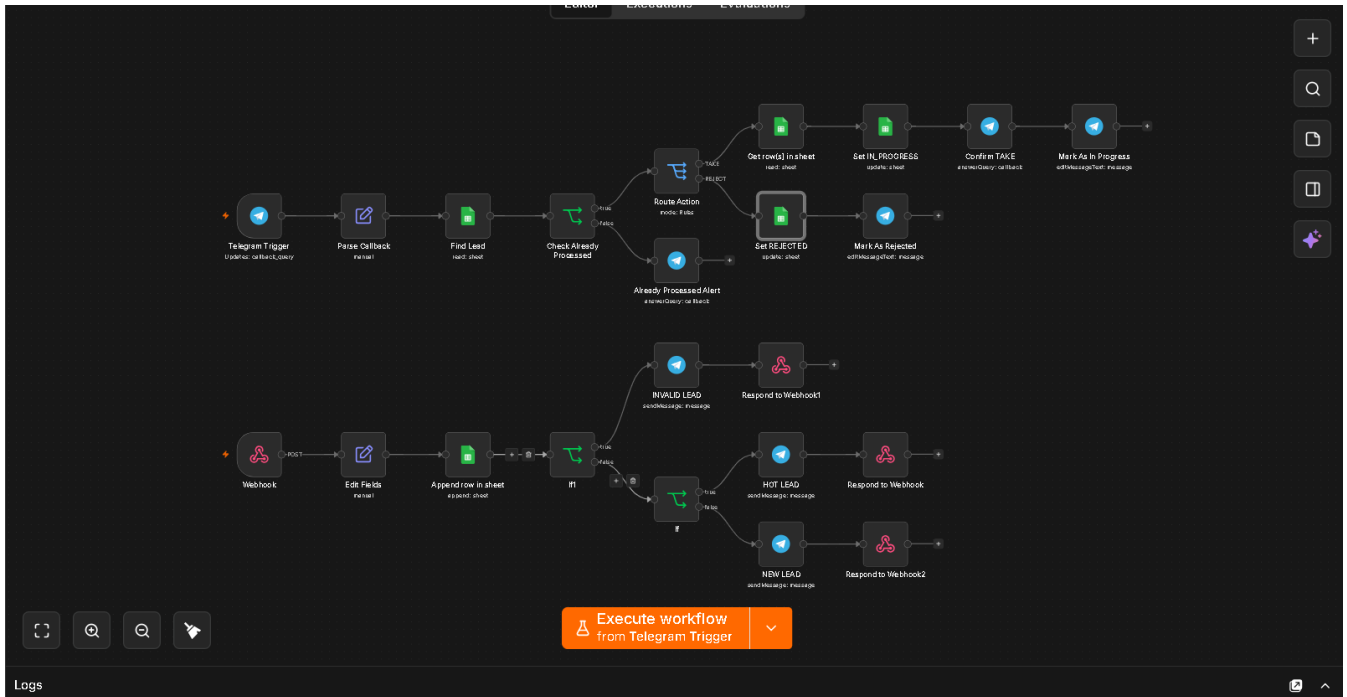

Implemented solution

Lead intake: HTTP POST Webhook receives name, phone, repair type, budget and comment. Each request receives a unique lead ID and timestamp.

Validation & classification: invalid submissions are marked INVALID; valid leads are classified as HOT or NEW using configurable business rules.

Manager processing: Telegram callback actions let a manager take or reject a lead. The workflow checks whether the lead has already been processed and stores manager identity and processing time.

n8n Workflow

Complete workflow: lead intake at the bottom and Telegram callback processing at the top.

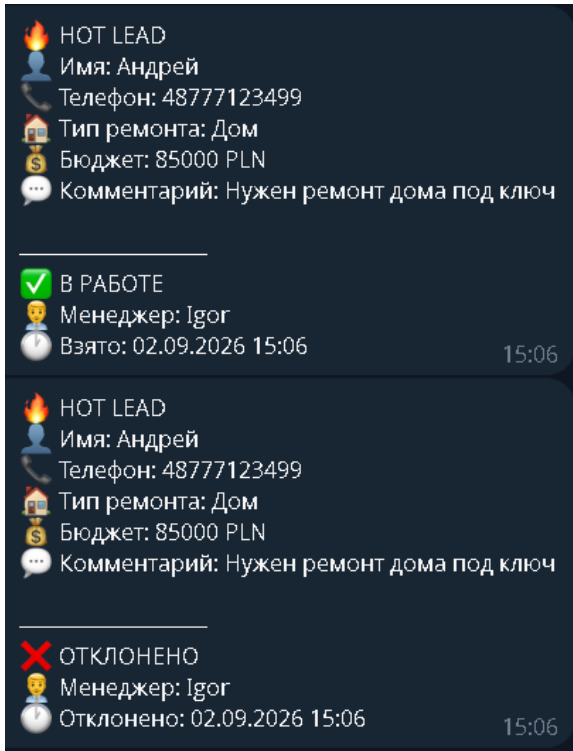

Core workflow capabilities

Webhook Trigger • Telegram Trigger • Google Sheets integration • IF conditions • Switch routing • JavaScript expressions • Callback Queries • Dynamic data mapping • API responses • State management • Duplicate-processing protection

Technology stack

Technology	Purpose
n8n	Workflow orchestration and business logic
Telegram Bot API	Manager notifications and interactive actions
Google Sheets	Lightweight lead database / CRM
Webhooks / JSON	Lead intake and data exchange
JavaScript expressions	Validation, routing and dynamic mapping

Working Result

77	OT	LEAD-202609-10000	Андрей	48777123499	Дом	85000	Нужен ремонт дома под ключ	2026-09-02 15:06	PL	IN PROGRESS	02.09.2026 15:06	Igor	gsm1024	688741617
78	OT	LEAD-202609-10001	Андрей	48777123499	Дом	85000	Нужен ремонт дома под ключ	2026-09-02 15:06	REJECTED	2026-09-02 15:06	Igor	gsm1024	688741617	

Telegram: processed leads are visibly marked IN PROGRESS or REJECTED, including manager and timestamp. **Google Sheets:** the same decisions are persisted with lead ID, manager status and manager identity.

Business value

The automation reduces manual data entry, gives managers a fast interface for lead handling, keeps a processing history, and prevents accidental duplicate work.

Possible production improvements

PostgreSQL or a full CRM • automatic manager assignment • AI lead qualification • follow-up reminders • email/SMS notifications • analytics dashboard • centralized error handling and logging • SLA monitoring
